

PROTECTA-GUN™

BOXES FOR HANDGUNS WITH LABELS

FIREARM STORAGE

For long term storage, we recommend applying oil or grease to the firearm and wrapping it in a protective paper before placing it in the PROTECTA-GUN™ box, or any cardboard box.

For this purpose, Robert's Arms Specialities offers two types of protective paper:

1. Gun Wrapper

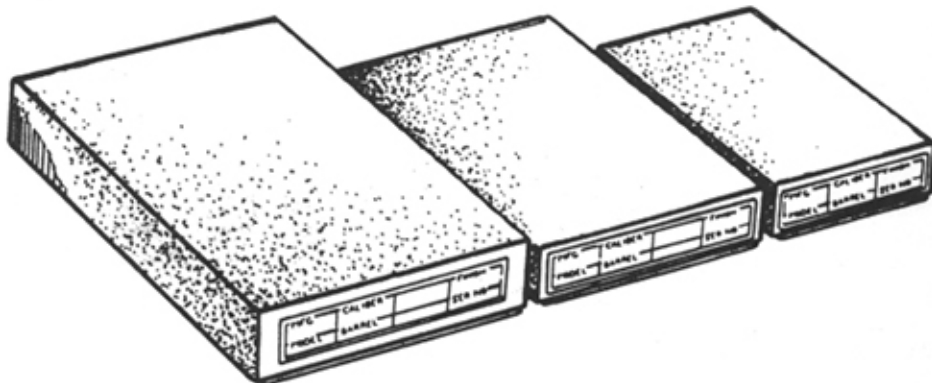

Brown Kraft paper with a plastic coating on one side. The plastic coated side to go next to the oiled firearm. Oil or grease will not penetrate the paper and stays on the gun. Because it is 22% heavier than double wax paper, our Gun Wrapper provides better protection from damage caused by movement in the box.

2. Double Waxed Paper

Brown paper with wax coating on both sides. Again, oil will not penetrate the paper.

Both sheets are 24" wide. A 24" x 54" (9 square ft.) sheet is \$3.00 plus shipping.

A 24" x 54" sheet adequately protects four to six large handguns. For orders of two or more sheets of either protective paper, we do not cut separately. Thus, an order for two sheets would be 24" wide x 108" long.
